Art Unit: 2822

This Office Action is in response to the response filed on January 14, 2005.

The amendment filed on September 21, 2004 has been entered.

Claim 24 is objected to because "said source/drain region that includes both boron and germanium" lacks antecedent basis (both in terms of "said source/drain region" in general and in terms of "said source/drain region that includes ... boron"). Correction is required.

Claims 20-23 are allowable over the prior art of record.

United States Patent 4,603,471 (Strain), United States Patent 4,835,112 (Pfiester et al.), United States Patent 5,134,447 (Ng et al.), United States Patent 5,298,435 (Aronowitz et al.) and United States Patent 6,696,729 (Adachi) are relevant to this application.

The prior art of record does not explicitly disclose or suggest the allowable integrated circuit taken as a whole, including the strained, P-type source and drain regions containing both a P-type impurity and germanium impurity.

This application is apparently in condition for allowance except for the above formal matter.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
